

Series EKC: 3/4" Disc Thermostat (High Temperature)

EKC is designed for heavy electric load, with a variety mounting flanges and terminal configurations.

The snap action of the bimetal disc provides high speed contact separation ensuring long contact life cycle and eliminating contact chattering.

EKC-0200 series is a narrow differential, adjustable temperature controls for applications where field adjustment is required such as electric water heaters.

Widely used in HVACR equipment, vending machines, dryer and heaters.

Temperature range: -30 to 170C (-22F to 338F)

Contact rating: SPST and SPDT with up to 35A@120/240VAC
